Call 2 Park

Cell Phone Parking Payment System

How to get started in your City:

The City authorizes the use of cell phones for parking.

Decide if you want parkers to enter meter numbers in addition to the Zone (Rate & Time Limits).

We sign an agreement authorizing Login to enroll parkers in Call 2 Park in your City.

Appropriate signage is placed on the street and/or meters.

We jointly develop a flyer explaining the City program.

How we enroll parkers in your City:

The City announces the program to the public.

We are on the street representing the City and the new program.

Using direct mail, our downtown kiosk and sales calls we will talk to parkers.

The downtown kiosk and our toll free customer service line will sign up parkers.

A form can also be completed online to get started.

How the City gets paid:

Call 2 Park uses prepaid accounts. Than can have automatic reloading when balances get low.

We accept Credit, Debit, wires, PayPal, bank transfers, and checks.

Accounts with automatic reloading must have a credit, debit or PayPal account on file.

Login is PCI compliant and does not store any financial information on line.

Each week, your revenue is paid to a city bank for all collections made the previous week.

A detailed report by parker ID number of all revenue received is sent to the Finance Dept.

How the system works on your City street:

Pull into a legal parking space and call the local number for the City.

Caller ID identifies the city, parker, and vehicle.

They enter the zone number (and meter number) and maximum time is authorized.

When they return, they hit redial and caller ID identifies them to stop charging.

Only the exact time used on the street is charged.

Parkers can choose to have text messages sent alerting them that time is about to expire.

How do we enforce Call 2 Park:

Each parker will receive an ID Badge. The badge has the parker ID number.

This badge can be used in any vehicle used by the parker.

The badge is displayed curb side in the front window.

A patrol officer will enter the badge number in a GPRS cell phone or PDA to verify payment.

Each verification is recorded for adjudication and evaluation of patrols.

The city and the parker have online access to all pertinent parking transaction data in real time.

Parkers save money by only paying for the exact time on the street. The prepaid account also assures they do not pay high fees every time they make a call, get a message, or check their parking status.
